

## disinfection-cabinet for our KR1000 improved ozone protection - less space requirement

With our disinfection-cabinet for the KR1000 from Medizin & Service you can conduct spatially divided disinfections of respirators.

### The profits for you!

#### ▶ optimal handling

Integrated power supply by safety socket outlet inside the cabinet; extendable work desk; possibility to connect the KR1000 with a PC by an integrated RS232-data cable

#### ▶ enormous savings of space

You do not need a separate room anymore for the disinfection with the KR1000.

#### ▶ improved staff protection

dissipation of the exhaust air optional:  
→ outward per direct air ducting  
→ over a link to the existing exhaust system  
→ as filtered inner exhaust air

#### ▶ ideal integration

It is possible to order your new disinfection cabinet in every random RAL colour.  
Of course the surface coating we are using is resistant against disinfection agents.
