

The heating of infusions is not only for guarantying a **patient friendly using** but especially **to prevent the risk of hypothermia**. The cost- and time saving method of heating within a closed warming system is already used in a lot of hospitals. The infusion warming drawer **CosyFusion®**, developed by **Medizin & Service GmbH**, is equipped with all necessary functions to be a useful and efficient assistant within your hospital.

Therefore it is ...

### ... easy to use:

- current temperature is best visible from the outside
- safety because of all pole switch off
- switch off of the warming system while opening
- easy cleaning because all parts are disinfectant proof

### ... and easy to integrate:

- panels made of steel sheet or stainless steel (powder coated in all RAL colors) as well as other materials
- with cabinet or as retrofitting system in different wides for cabinet systems of different manufacturers:

#### 2 CosyFusion® systems in one cabinet

- can be used individually - also with different temperatures
- possible external measurements:  
w 460 x d 635 mm  
w 600 x d 635 mm  
more measures on request

Abbildung Beispielhaft

#### As single CosyFusion® to upgrade

- different measures for different cabinet systems of different manufacturers
- possible external measurements:  
w 600 x d 580 x h 355 mm (DIN)  
w 680 x d 460 x h 355 mm (ISO)  
more measures on request

Abbildung Beispielhaft

#### Within the cabinet, together with a drawer

- one **CosyFusion®** and one drawer for storage
- possible external measures:  
w 460 x d 635 x h 750 mm  
w 600 x d 635 x h 750 mm  
more measures on request

Abbildung Beispielhaft

#### Technical data

- low noise and thermally insulated
- variable temperature from 30 - 50 centigrade
- integrated drip pan
- cable length 1,5 m
- power supply 230 V, 50 Hz, 10 A, 500 W  
(secured with earth-leakage circuit breaker)

#### Ranges of application

- all departments within the hospital, especially:
- operating room
  - intensive care unit
  - children´s department

#### Cleaning and disinfection

- all parts are protected against corrosion and are disinfectant proof
- grating removable for easy cleaning
